	List o	of new drugs	(r-DNA origin) ap	proved for impor	t and marketing in India during Jan, 2020 – J	an, 2025
S. No.	Name of the firm	Date of Permission	Permission No.	Name of the Drug		Dosage Form & Strength
1	M/s Bristol- Myers Squibb India Pvt. Ltd.		IMP/BIO/20/000008	Ipilimumab Injection, 50 mg/10 mL (5 mg/mL), Single use vial	Renal Cell Carcinoma (RCC) Ipilimumab is indicated for treatment of patients with intermediate or poor risk, previously untreated advanced renal cell carcinoma, in combination with Nivolumab. Recommended dosage Combination phase: The recommended dose during the combination phase is Ipilimumab 1 mg/kg administered intravenously over a period of 30 minutes every 3 weeks for the first 4 doses in combination with Nivolumab 3 mg/kg administered intravenously over a period of 30 minutes, followed by the single-agent phase. Single-agent phase: The recommended dose of Nivolumab during the single- agent phase is 3 mg/kg every two weeks administered intravenously over a period of 30 minutes.	concentrate for solution for infusion for intravenous injection Strength: 5 mg/mL
2.	M/s Sandoz Private Limited	15.03.2020	IMP/BIO/19/000001 (Initial approval		Ranibizumab is indicated in preterm inf ants for: The treatment of retinopathy of prematurity (ROP) with zone I (stage1+, 2+, 3 or 3+), zone II (stage 3+) or AP-ROP (aggressive posterior ROP) disease (Additional Indication)	of Panihizumah in 0.23
3	M/s Sandoz Private Limited		IMP/BIO/20/000026		Crizanlizumab is indicated to reduce the frequency of vasoocclusive crises in adults and pediatric patients aged 16 years and older with sickle cell disease.	
4	M/s Dr. Reddy's Laboratories		IMP/BIO/20/000029	Evolocumab Solution for Injection 140mg/ml (r-DNA origin)	INVIDATOROLASTATOLISAMIS IN COMPINSTION WITH OTHER LINIA-	use Prefilled Syringe / Prefilled Autoinjector Strength: Evolocumab Injection 140 mg/mL

	Ltd				non-familial) or mixed dyslipidaemia, as an adjunct to diet: in combination with a statin or statin with other lipid lowering therapies in patients unable to reach LDL-C goals with the maximum tolerated dose of a	
					statin or, alone or in combination with other lipid- lowering therapies in patients who are statin- intolerant, or for whom a statin is contraindicated., 3) Evolocumab is indicated in adults with Established atherosclerotic cardiovascular disease (myocardial infarction, stroke or peripheral arterial disease) to reduce cardiovascular risk by lowering LDL-C levels, as an adjunct to correction of other risk factors: in combination with the maximum tolerated dose of a statin with or without other lipid-lowering therapies or,	
5	M/s Sandoz Private Limited	1-07-2020	IMP/BIO/20/000056	Brolucizumab solution for injection 120 mg/mL (r-DNA origin)	For the treatment of neovascular (wet) age-related macular degeneration (AMD)	Dosage Form: Solution for Injection (1 Vial + 1 filter needle) Strength: 120 mg/mL
	M/s Novo Nordisk India Pvt Ltd		IMP/BIO/20/000059	Catridecacog (recombinant coagulation factor XIII) 2500 IU (Novo Thirteen)	Novo Thirteen can be used for all age groups	Powder for solution for injection in vial Strength: 2500 IU
	M/s Novo Nordisk India Pvt Ltd		IMP/BIO/20/000060	Semaglutide	intolerance or contraindications; • in combination with other medicinal products for the treatment of diabetes	Strength 3 mg Tablets, 7 mg Tablets and 14 mg Tablets
l l	M/s Novo Nordisk India Pvt Ltd	5-08-2020	IMP/BIO/20/000063	Nonacog beta pegol	Nonacog beta pegol is indicated for treatment and prophylaxis of bleeding in pretreated patients with haemophilia B (congenital factor IX deficiency	Dosage Form: Lyophilized

9	M/s Baxalta Bioscience India Pvt.Ltd	9-09-2020	IMP/BIO/20/000068	Rurioctocog alfa pegol (PEGylated recombinant human FVIII)	Rurioctocog alfa pegol (Adynovate) is a human antihemophilic factor indicated in children and adults with Hemophilia A (congenital factor VIII deficiency) for: On-demand treatment and control of bleeding episodes Perioperative management Routine prophylaxis to reduce the frequency of bleeding episodes	Powder for solution for injection, Strength 250 IU/500 IU/750
10	M/s Cipla Limited	27-10-2020	IMP/BIO/20/000082 Note: Additiona Marketing Authorization	Recombinant Human Growth Hormone (Somatropin) Injection 4 IU, (IP)	Long term, treatment of children who have growth failure due to endogenous growth hormone and for treatment of short stature in children with Turner's syndrome confirmed by Chromosomal analysis	Dosage Form: Powder for solution for Injection. Each vial of Recombinant human Growth Hormone (EUTROPIN) contains 4 IU of Recombinant Human Growth Hormone (somatropin). The pack is supplied with 1 mL vial for injection for subcutaneous use
11	M/s Merck Specialities Private Limited	29-10-2020	IMP/BIO/20/000085	Follitropin alfa (r- DNA origin) and Lutropin alfa (r- DNA origin) Injection (Brand Name: Pergoveris)	Pergoveris is indicated for the stimulation of follicular development in adult women with severe LH and FSH deficiency	Dosage Form: Solution for Injection in Prefilled Pen Strength: 1. Pergoveris (300 IU rhFSH + 150 IU r-hLH)/0.48 mL; 2. Pergoveris (450 IU rhFSH + 225 IU r-hLH)/0.72 mL; 3. Pergoveris (900 IU rhFSH + 450 IU r-hLH)/1.44 mL.
12	M/s AstraZeneca Pharma India Limited	16-12-2020	IMP/BIO/20/000097	Benralizumab	Benralizumab is indicated as an add-on maintenance treatment for severe asthma with an eosinophilic phenotype in adult patients. The recommended dose is 30 mg of Benralizumab by subcutaneous injection every 4 weeks for the first 3 doses, and then every 8 weeks thereafter	injection in a single dose prefilled syringe (with Needle Safety Guard) for

13	M/s Novo Nordisk India Private Limited	02-03-2021	IMP/BIO/21/000001	Pegol	Turoctocog alfa pegol [antihemophilic factor (recombinant), glycopegylated-exei] is a recombinant DNA-derived coagulation Factor VIII concentrate indicated for use in adults and children with hemophilia A for: On-demand treatment and control of bleeding episodes Perioperative management of bleeding Routine prophylaxis to reduce the frequency of bleeding episodes Limitation of Use: Turoctocog alfa pegol is not indicated for the treatment of von Willebrand	lyophilised powder for reconstitution into a solution for injection for intravenous use Strengths: 500 IU/vial, 1000 IU/vial, 1500 IU/vial, 2000 IU/vial and 3000 IU/vial; single dose
14	M/s Novartis Healthcare Private Limited	12-03-2021	IMP/BIO/21/000004	Ofatumumab	sclerosis (MS), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, in adults.	Dosage Form: Solution for injection in pre-filled syringe Strength: Ofatumumab 20 mg/0.4 mL
15	M/s Novartis Healthcare Private Limited	26-03-2021	Import 6200/05 dated 26.10.2005, 12-57/05- DC/Novartis/09. Suppl.Changes-1 dated 01.04.2010, 4- 16/Novartis/PAC-R- Omalizumab/14-BD dated 22.10.2014, 4- 17/Novartis/PAC-R- Omalizumab/15-BD dated 18.05.2015, 4- 160/ Novartis/PAC- R-Omalizumab/15- BD dated 26.10.2015	Omalizumab	Additional indication - Omalizuamb is indicated as an add-on therapy with intranasal corticosteroids (INC) for the treatment of adults (18 years and above) with severe Chronic rhinosinusitis with nasal polyps for whom therapy with INC does not provide adequate disease control	(a) Omalizumab powder and solvent for solution for injection 75 mg & 150 mg single-use vial (b) Omalizumab solution for injection in a pre- filled syringe 75 mg/0.5 mL and 150 mg/1.0 mL single-use pre-filled syringe; for subcutaneous administration only
16	M/s Sanofi- synthelabo (India) Pvt. Ltd.	08-04-2021	P-119/2016 dated 02-Aug-2016	Agalsidase Beta	un ballenis wiin a confirmed diadnosis of Fabry	Agaleidasa Bota (r.DNA

						Dosage Form: Powder for Concentrate for Solution for Infusion
177	M/s Roche Products (India) Pvt. Ltd	03-05-2021	IMP/BIO/21/000017	Casirivimab (r- DNA origin) and Imdevimab (r- DNA origin)	indicated for restricted use in emergency situation, for the treatment of mild to moderate corona virus disease 2019 (COVID-19) in adults and pediatric patients (12 years of age and older weighing at least 40 kg) with laboratory confirmed SARS-COV2 infection and who are at high risk of severe COVID-19 and does not require oxygen.	solution. Imdevimab is a sterile, preservative- free, clear to slightly opalescent, color less to pale yellow solution with a pH of 6.0. Casirivimab and Imdevimab are each supplied in individual single-dose vials. Casirivimab and Imdevimab is approved at combine dose of 1200 mg (600 mg of each drug) administered by intravenous infusion or subcutaneous route.
18	M/s Amger Technology Private Limited,	04-05-2021	IMP/BIO/21/000018	Romosozumab	Osteoporosis at High Risk for Fracture Romosozumab is indicated for the treatment of osteoporosis in postmenopausal women at high risk for fracture, defined as a history of osteoporotic fracture, or multiple risk factors for fracture; or patients who have failed or are intolerant to other available osteoporosis therapy.	Romosozumab (r-DNA origin) Injection 90 mg/mL. 105 mg/1.17mL clear to opalescent, colorless to light yellow solution for injection in a single- use
19	M/s Johnsor & Johnson Pvt				a) In combination with lenalidomide and dexamethasone or with bortezomib, melphalan and prednisone for the treatment of adult	Daratumumab 1800 mg (120 mg/mL). The product is supplied in vial

	Ltd	01-06-2021	IMP/BIO/21/000027		whose prior therapy included a proteasome inhibitor and an immunomodulatory agent.	liquid for subcutaneous injection. Each vial contains 1800 mg of Daratumumab in a 15mL nominal fill volume and an excess volume of at least 1.3mL. The Drug Product contains no preservatives and is for single use only.
20	M/s Merck Specialities Private Limited	02-06-2021	IMP/BIO/19/000052 (Drug originally approved on 31- Dec-2019	Avelumab	Additional indication - 1) Avelumab is indicated as monotherapy for the first-line maintenance treatment of adult patients with locally advanced or metastatic urothelial carcinoma (UC) whose disease has not progressed with first-line platinum-based induction chemotherapy. 2) Avelumab in combination with axitinib is indicated for the first-line treatment of adult patients with advanced renal cell carcinoma (RCC)	solution for infusion (Intravenous Infusion) Strength: 20 mg/ml vial
21	M/s Roche Products (India) Pvt. Ltd	09-06-2021	IMP/BIO/21/000030	Satralizumab	combination with immunosuppressants for the treatment of adult and adolescent patients with neuromyelitis optica spectrum disorders (NMOSD).	120 mg/ml pre-filled
22	M/s Eli Lilly and Company (India) Pvt. Ltd.		IMP/BIO/21/000038	Insulin Lispro Ultrarapid	Treatment of diabetes mellitus in adults.	Solution for Injection 100 units/ml and 200 units/ml Presentations: 1. Insulin Lispro Ultrarapid Injection 100 units/ml, 3ml cartridge & 3ml prefilled pen 2. Insulin Lispro Ultrarapid

						Injection 100 units/mL, 10ml vial, multiple dose for Subcutaneous and Intravenous use 3. Insulin lispro Ultrarapid Injection 200 units/ml, 3ml prefilled pen
23	M/s Pfizer Limited	29-09-2021	MP/BIO/21/000080	Infliximab	Infliximab is indicated for reducing signs and symptoms and inducing and maintaining clinical remission in adult patients with moderately to severely active disease who have had an inadequate response to conventional therapy. Infliximab is indicated for reducing the number of draining enterocutaneous and rectovaginal fistulas and maintaining fistula closure in adult patients with fistulizing Crohn's disease. Pediatric Crohn's Disease Infliximab is indicated for reducing signs and symptoms and inducing and maintaining clinical remission in pediatric patients 6 years of age and older with moderately to severely active disease who have had an inadequate response to conventional therapy. Ulcerative Colitis Infliximab is indicated for reducing signs and symptoms, inducing and maintaining clinical remission and mucosal healing, and eliminating corticosteroid use in adult patients with moderately to severely active ulcerative colitis who have had an inadequate response to conventional therapy. Pediatric Ulcerative Colitis	Lyophilized Powder for Concentrate for Solution for Intravenous Infusion;

					 Infliximab is indicated for reducing signs and symptoms and inducing and maintaining clinical remission in pediatric patients 6 years of age and older with moderately to severely active ulcerative colitis who have had an inadequate response to conventional therapy. Rheumatoid Arthritis Infliximab, in combination with methotrexate, is indicated for reducing signs and symptoms, inhibiting the progression of structural damage, and improving physical function in patients with moderately to severely active rheumatoid arthritis. Ankylosing Spondylitis Infliximab is indicated for reducing signs and symptoms in patients with active ankylosing spondylitis. Psoriatic Arthritis Infliximab is indicated for reducing signs and symptoms of active arthritis, inhibiting the progression of structural damage, and improving physical function in patients with psoriatic arthritis. 	
24	M/s Roche Products (India) Pvt. Ltd.	01-10-2021	IMP/BIO/21/00 0082	Pertuzumab- Trastuzumab	 1. Early Breast Cancer (EBC) Pertuzumab-Trastuzumab Injection is indicated for use in combination with chemotherapy for: The neoadjuvant treatment of adult patients with HER2-positive, locally advanced, inflammatory, or early stage breast cancer (either greater than 2 cm in diameter or node positive) as part of a complete treatment regimen for early breast cancer. The adjuvant treatment of adult patients with HER2- positive early breast cancer at high risk of recurrence. Metastatic Breast Cancer (MBC) 	subcutaneous injection Strength: 600mg Pertuzumab + 600mg Trastuzumab [10ml/15cc vial] and 1200mg Pertuzumab + 600mg Trastuzumab vial

	1	ı			1	
					Pertuzumab-Trastuzumab Injection is indicated for	
					use in combination with docetaxel for the treatment	
					of adult patients with	
					HER2-positive metastatic breast cancer who	
					have not received prior anti-HER2 therapy or	
					chemotherapy for metastatic disease	
25	M/s Bristol-	09-06-2016	IMP-88/2016	Nivolumab	1. Non-small cell lung cancer (NSCLC):	Nivolumab concentrate
20	Myers Squibb		100/2010	ravoidinab	Nivolumab as a single agent is indicated for	
	India Pvt. Ltd.				the treatment of locally advanced or	40 mg and 100 mg
	ilidia i vi. Lid.				1	
					metastatic non-small cell lung cancer	Strongth: 10 mg/ml
					(NSCLC) after prior chemotherapy (approved on 09.06.2016).	Strength: 10 mg/mL
					 Nivolumab, in combination with 	
					ipilimumab, is indicated for the first-line	
					treatment of adult patients with metastatic	
					non-small cell lung cancer (NSCLC) whose	
					tumors express PD-L1 (≥1%) as	
					determined by a validated test, with no EGFR	
					or ALK genomic tumor aberrations (additional	
					indication approved on 09.04.2021).	
					Nivolumab, in combination with ipilimumab	
					and 2 cycles of platinum- doublet	
					chemotherapy, is indicated for the first-line	
					treatment of adult patients with metastatic or	
					recurrent non-small cell lung cancer	
					(NSCLC), with no EGFR or ALK genomic	
					tumor aberrations (additional indication	
					approved on 09.04.2021)	
					2) Renal cell carcinoma (RCC):	
					Nivolumab as a single agent is indicated for	
					the treatment of patients with advanced renal	
					cell carcinoma (RCC) after prior therapy in	
					adults (approved on 09.06.2016).	
					 Ipilimumab is indicated for treatment of 	
					patients with intermediate or	
					poor risk, previously untreated	
					advanced renal cell carcinoma, in	
					combination with Nivolumab (additional	
					indication approved on 04.06.2020).	
					3) Squamous Cell Carcinoma of the Head and	
					Neck (SCCHN):	
<u> </u>					1400K (0001114).	

Nivolumab as monotherapy is indicated for the treatment of recurrent or metastatic squamous cell carcinoma of the head and neck after platinum based therapy (additional indication approved on 04.10.2017).

4) Melanoma:

- Nivolumab as a single agent is indicated for the treatment of patients with BRAF V600 wild type unresectable or metastatic melanoma (additional indication approved on 12.06.2018) Nivolumab as a single agent is indicated for the treatment of patients with BRAF V600 Mutation positive unresectable or metastatic melanoma (approved on 02.07.2018)
- Nivolumab is indicated for the treatment of patients with melanoma with lymph node involvement or metastatic disease who have undergone complete resection, in the adjuvant settings (additional indication approved on 18.04.2019)
- 5) Classical Hodgkin Lymphoma (cHL) (additional indication approved on 12.06.2018): Nivolumab is indicated for the treatment of adult patients with classical Hodgkin lymphoma (cHL) that has relapsed or progressed after:
 - autologous hematopoietic stem cell transplantation (HSCT) and brentuximab vedotin, or
 - 3 or more lines of systemic therapy that includes autologous HSCT.

6) Urothelial Carcinoma (UC) (additional indication approved on 18.04.2019)-

Nivolumab is indicated for the treatment of patients with locally advanced or metastatic urothelial carcinoma who:

- have disease progression during or following platinum- containing chemotherapy.
- have disease progression within 12 months of neoadjuvant or adjuvant treatment

26	M/s Cipla	14-10-2021	IMP/BIO/21/000085	Insulin Lispro I.P.	with platinum-containing chemotherapy 7) Colorectal Cancer (CRC) - Nivolumab as monotherapy is indicated for the treatment of adult and pediatric (12 years and older) patients with microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) metastatic colorectal cancer (CRC) that has progressed following treatmentwith a fluoropyrimidine, oxaliplatin, and irinotecan (additional indication approved on 18.04.2019). 8) Esophageal squamous cell carcinoma (ESCC): Nivolumab is indicated for the treatment of unresectable advanced, recurrent, or metastatic esophageal squamous cell carcinoma (ESCC) after prior fluoropyrimidine and platinum- based Chemotherapy (additional indication approved on 04.08.2021). 9) Gastric Cancer Gastroesophageal Junction Cancer and Esophageal Adenocarcinoma (Gastric, GEJC or EAC): Nivolumab in combination with fluoropyrimidine and platinum- containing chemotherapy is indicated for the treatment of patients with advanced or metastatic gastric cancer, gastroesophageal junction cancer, and esophageal adenocarcinoma (additional indication approved on 30.11.2021). 10) Adjuvant treatment of Resected Junction Cancer (EC or GEJC) Esophageal or Gastroesophageal: Nivolumab is indicated for the adjuvant treatment of esophageal or completely resected gastroesophageal junction cancer with residual pathologic disease in patients, who have received neoadjuvant chemoradiotherapy (CRT) (additional indication approved on 30.11.2021). Diabetes mellitus	
20	Limited	14-10-2021	Note: Additional Marketing Authorization		Diabetes mellitus	Strength: 100 IU/mL, Cartridge and prefilled pen and 200U/ml, prefilled pen

27	M/s Cipla Limited	30-09-2021	IMP/BIO/21/000084 Note: Additiona Marketing Authorization	Insulin Lispro Biphasic I njection I.P. (25% Insulin Lispro and 75% Insulin Lispro Protamine)	Diabetes mellitus	Suspension for Injection in Cartridge and prefilled pen Strength: 100IU/mL
28	M/s Takeda Pharmaceutical s India Pvt. Ltd.	20-10-2021	IMP/BIO/21/000089	Brentuximab Vedotin	Previously untreated Stage III or IV classical Hodgkin lymphoma (cHL), in combination with chemotherapy 2. Classical Hodgkin lymphoma (cHL) consolidation 3. Relapsed classical Hodgkin lymphoma(cHL) 4. Previously untreated systemic anaplastic large cell lymphoma (sALCL) or other CD30-expressing peripheral T-cell lymphomas (PTCL), in combination with chemotherapy 5. Relapsed systemic anaplastic large cell lymphoma (sALCL) 6. Relapsed primary cutaneous anaplastic large cell lymphoma (pcALCL) or CD30-expressing mycosis fungoides (MF)	Powder for concentrate for solution for infusion in vial Strength: 50 mg
29	M/s Cipla Limited	29-11-2021	IMP/BIO/21/000096 Note: Additional Marketing Authorization	Recombinant Human Erythropoietin injection I.P.	For treatment of anemia in chronic renal failure patients	Solution for injection Strength: 2000 IU/0.5 ml, 3000 IU/0.3 ml, 4000 IU/0.4 ml, 6000 IU/0.6 ml, 8000 IU/0.8 ml and 10000 IU/1.0ml Solution for injection in pre-filled syringe
30	M/s Cipla Limited	09-12-2021	IMP/BIO/21/000100 Note: Additional Marketing Authorization	Insulin Lispro Biphasic Injection I.P. (50% Insulin Lispro and 50% Insulin Lispro Protamine suspension) Injection (r-DNA origin)	For the treatment of patients with diabetes mellitus who require insulin for the maintenance of normal glucose homeostasis	Suspension for injection in Cartridge & prefilled pen Strength:100 IU/mL

31	M/s Cipla Limited	22-12-2021	Note: Additional	Recombinant Human Erythropoietin injection I.P.	For treatment of anemia in chronic renal failure patients	Solution for injection in vial Strength:10,000 IU/ 1mL, 20,000 IU/2mL
32	M/s Dr. Reddy's Laboratories Limited	05-01-2022	IMP/BIO/22/000001	Romosozumab	Treatment of Postmenopausal Women with Osteoporosis at High Risk for Fracture Romosozumab is indicated for the treatment of osteoporosis in postmenopausal women at high risk for fracture, defined as a history of osteoporotic fracture, or multiple risk factors for fracture; or patients who have failed or are intolerant to other available osteoporosis therapy. Limitations of Use The anabolic effect of Romosozumab wanes after 12 monthly doses of therapy. Therefore, the duration of Romosozumab use should be limited to 12 monthly doses. If osteoporosis therapy remains warranted, continued therapy with an anti-resorptive agent should be considered. Two 105 mg/1.17 mL single use prefilled syringes are required to administer the recommended 210 mg dose of Romosozumab	Solution for injection in a single-use prefilled syringe for Subcutaneous use. Strength: 90 mg/mL
33	M/s Bristol- Myers Squibb India Pvt. Ltd.		IMP/BIO/22/000002	Luspatercept	Myelodysplastic syndromes (MDS): Luspatercept is indicated for the treatment of adult patients with transfusion-dependent anaemia due to very low, low and intermediate- risk myelodysplastic syndromes (MDS) with ring sideroblasts, who had an unsatisfactory response to or are ineligible for erythropoietin- based therapy. β-thalassemia: Luspatercept is indicated for the treatment of adult patients with transfusion-dependent anaemia associated with beta- thalassaemia.	Lyophilized Powder for solution for injection in vial. Strength: 25 mg and 75 mg
34	M/s Cipla Limited	04-02-2022	IMP/BIO/22/000006 Note: Additional Marketing Authorization	Dulaglutide	Dulaglutide is a glucagon-like peptide-1 (GLP-1) receptor agonist indicated: 1. as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. 2. to reduce the risk of major adverse cardiovascular events (cardiovascular death,	Dosage Form: Solution for Injection Strength: 0.75 mg/0.5 ml in Prefilled Pen and 1.5 mg/0.5 ml

					non-fatal myocardial infarction, or non-fatal stroke) in adults with type 2 diabetes mellitus who have established cardiovascular disease or multiple cardiovascular risk factors.
35	M/s Johnson &02- Johnson Pvt. Ltd.,			Daratumumab	 In combination with lenalidomide and dexamethasone or with bortezomib, melphalan and prednisone for the treatment of adult patients with newly diagnosed multiple myeloma who are ineligible for autologous stem cell transplant. For the treatment of patients with relapsed and refractory multiple myeloma, whose prior therapy included a proteasome inhibitor and an immunomodulatory agent. In combination with lenalidomide and dexamethasone, or bortezomib and dexamethasone for the treatment of adult patients with multiple myeloma who have received at least one prior therapy (indication approved on 08.02.2022). As monotherapy for the treatment of adult patients with relapsed and refractory multiple myeloma, whose prior therapy included a proteasome inhibitor and an immunomodulatory agent and who have demonstrated disease progression on the last therapy (indication approved on 08.02.2022).
36	M/s Eli Lilly07- and Company (India) Pvt. Ltd.	-02-2022 I	MP/BIO/22/00 0012	Ixekizumab	 Psoriatic Arthritis: Ixekizumab, is indicated for the treatment of adult patients with active psoriatic arthritis., Plaque Psoriasis: Ixekizumab is indicated for the treatment of adult patients with moderate-to severe plaque psoriasis who are candidates for systemic therapy or phototherapy Solution for Injection in Prefilled Autoinjector and Prefilled Syringe Strength: 80 mg/mL

37	M/s Johnson &08-02-2022 Johnson Pvt. Ltd.	IMP/BIO/22/000013	Amivantamab	Treatment of patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with activating epidermal-growth factor receptor (EGFR) Exon 20 insertion mutations whose disease has progressed on or after platinum- based chemotherapy.	
38	M/s Cipla07-02-2022 Limited		Recombinant Human Follicle Istimulating Hormone solution for injection I.P.	Treatment of female infertility	Solution for injection Strengths: 75IU/ 0.15mL, 150 IU/0.3mL, 225 IU/0.45mL, 300 IU/0.6mL Solution for injection in prefilled syringe
39	M/s GlaxoSmithKlin e Pharmaceutical s Limited	IMP147/2018	Mepolizumab	Eosinophilic granulomatosis with polyangiitis (EGPA) Mepolizumab is indicated as an add-on treatment for adult patients with relapsingremitting or refractory eosinophilic granulomatosis with polyangiitis (EGPA). Hypereosinophilic syndrome (HES) Mepolizumab is indicated as an add-on treatment for adult patients with inadequately controlled hypereosinophilic syndrome without an identifiable nonhaematologic secondary cause (additional indication approved on 15.03.2022)	Solution for injection in pre-filled pen (auto-injector) or pre-filled syringe (safety syringe) Strength:100 mg/mL
40	M/s Johnson &10-03-2022 Johnson Pvt. Ltd.	IMP/BIO/22/000020	Ustekinumab	Ustekinumab is indicated for: Inducing and maintaining clinical response, Inducing and maintaining clinical remission, Eliminating corticosteroid use, Inducing endoscopic healing, Improving health-related quality of life in adults with moderately to severely active Crohn's	1. Concentrate solution for IV infusion in single use vial; Strength: 130 mg/ 26 ml, 2. Solution for injection (Sub cutaneous) in prefilled syringe; Strength: 45 mg/0.5 ml, Strength: 90 mg/ml

					anti-TNF treatment	
41	M/s Novo Nordisk India Pvt. Ltd.	20-04-2022	IMP/BIO/22/000031	Semaglutide	It is indicated as an adjunct to a reduced calorie diet and increased physical activity for chronic weight management in adults with an initial body mass index (BMI) of	Solution for injection (in prefilled pen (Single dose Pen injector)
					 30 kg/m² or greater (obesity) or 27 kg/m² or greater (overweight) in the presence of at least one weight-related comorbid condition (e.g., hypertension, type 2 diabetes mellitus, or dyslipidemia) 	Strength: Each pre- filled pen contains 1. 0.25 mg Semaglutide in 0.5 mL, 2. 0.5 mg semaglutide in 0.5 mL,
					Limitations of Use:	3. 1.0 mg semaglutide in
					 It contains semaglutide and should not be co- administered with other semaglutide containing products or with any other GLP-1 receptor agonist. The safety and effectiveness of semaglutide in combination with other products intended for weight loss, including prescription drugs, over-the-counter drugs, and herbal preparations, have not been established. It has not been studied in patients with a history of pancreatitis. 	0.75 mL
42	M/s Takeda Pharmaceutical s India Pvt. Ltd.	26-07-2022	IMP/BIO/22/000053	Vedolizumab	Vedolizumab 108mg is indicated as only for maintenance treatment by subcutaneous route once every 2 weeks, following at least 2 intravenous infusions (Vedolizumab IV 300 mg), for the following indications:	
					Ulcerative colitis Vedolizumab is indicated for the treatment of adult patients with moderately to severely active ulcerative colitis who have had an inadequate response with lost response to or were intolerant to either conventional therapy or a tumor necrosis factor-alpha (TNFα) antagonist.	Strength: 108 mg

43	Products India	IMP/BIO/22/000055	Somatrogon	Crohn's disease Vedolizumab is indicated for the treatment of adult patients with moderately to severely active Crohn's disease who have had an inadequate response with lost response to or were intolerant to either conventional therapy or a tumor necrosis factoralpha (TNFα) antagonist Indicated for the treatment of children and adolescents from 3 years of age	Solution for injection
	Private Limited			with growth disturbance due to insufficient secretion of growth hormone	Strength: Each Prefilled pen contains: 1. 24mg/mL and. 2. 60mg/1.2mL solution for injection in prefilled pen.
44	Nordisk India Pvt. Ltd.	IMP/BIO/22/000068		 30 kg/m² or greater (obesity) or 27 kg/m² or greater (overweight) in the presence of at least one weight-related comorbid condition (e.g., hypertension, type 2 diabetes mellitus, or dyslipidemia) Limitations of Use: It contains semaglutide and should not be coadministered with other semaglutide containing products or with any other GLP-1 receptor agonist. The safety and effectiveness of semaglutide in combination with other products intended for weight loss, including prescription drugs, over-the-counter drugs, and herbal preparations, have not been established. It has not been studied in patients with a history of pancreatitis. 	Solution for Injection in Prefilled Pen Strength: 0.25mg/0.5mg/1mg/1.7mg/2.4mg
45	M/s Bristol- Myers Squibb India Pvt. Ltd.
